Hydrol-Tek International Sub. Receives 3 Large Contracts 4/4 '08

Zephyrhills, FL – January 5, 2009 Hydrol-Tek International Inc. (OTC: HTIFF) and (Deutsche-Boerse: HY2) announced today that its wholly owned subsidiary Hydrol-Pro Technologies Inc. has received 3 large contracts in fourth quarter, '08.

Hydrol-Pro Technologies has negotiated and signed 3 contracts for a total of approx. \$3.5Million US during the last quarter of 2008. The contracts involve manufacture and installation of 3 large BioMEER Tissue Digesters to state funded veterinary research facilities in states of Oklahoma, New Mexico and Pennsylvania. A relatively large Bio-Effluent Decontamination System is also being provided along with one of digesters.

“Since most of the identified future opportunities are long-term projects and mostly government funded, we feel quite positive about new order receipt activity in the coming year. Hydrol-Pro’s markets are fairly recession proof and our BioMEER advanced technology feeds the growing ‘green industry’ well.” says Kim Etherington, VP of Hydrol-Tek.

“With landing these 3 contracts to be completed over the next 6 months, Hydrol-Pro establishes a healthy business level in addition to its previously received contracts for several digesters and BEDS to US and Canadian customers” states Hydrol-Tek VP, Kim Etherington. “Recent sales and trade show exhibit activity has raised awareness of Hydrol-Pro, created numerous sales leads and is filling the order ‘pipeline’ to make 2009 a progressive year for Hydrol-Tek”

Hydrol-Tek International with its wholly owned subsidiary Hydrol-Pro Technologies Inc. has on-going projects and revenue in the Life Sciences and Veterinary College market in USA and Canada. The brand name for Hydrol-Pro’s systems is BioMEER.
